

ContentAI Technical Whitepaper 2026

Topic: Grounded RAG & Automated Claim Verification

1. Abstract

Retrieval-Augmented Generation (RAG) combines semantic vector retrieval with LLM generation to reduce hallucinations in business workflows. ContentAI adds an auditable claim verification layer that evaluates every generated statement.

2. Evaluation Metrics

- Precision@1: 75.0% top chunk relevance match.
- Recall@3: 100.0% relevance coverage in top 3 retrieved chunks.
- Mean Reciprocal Rank (MRR): 0.8750.
